FLKEY 37

The ultimate MIDI keyboard for FL Studio

FLKEY MINI

The ultimate compact MIDI keyboard for FL Studio

Customer

Charlie – FL Studio Producer

Customer Overview

Charlie started producing in their bedroom studio a year ago, and after watching countless hours of YouTube tutorials, they're getting excited about their new tracks. Now Charlie is working towards the day that their music will be good enough to put Soundcloud and Spotify for the world to hear. They're constantly looking for ways to level up their production and see a MIDI keyboard as a way to make better music, and to keep themselves in the creative flow.

Customer Goals

- Finish more tracks.
- Create high quality, professional sounding tracks.
- Share their tracks on Soundcloud or Spotify.

Customer Needs

- Solutions that fit within a tight budget. They want to maximise any investment they put into their studio and get the best value.
- A minimal, space efficient set up. They're more likely to be in a shared or rented accommodation and are therefore more space conscious. Any large product will need to benefit them significantly to be worth the space it takes up.

Feature Overview

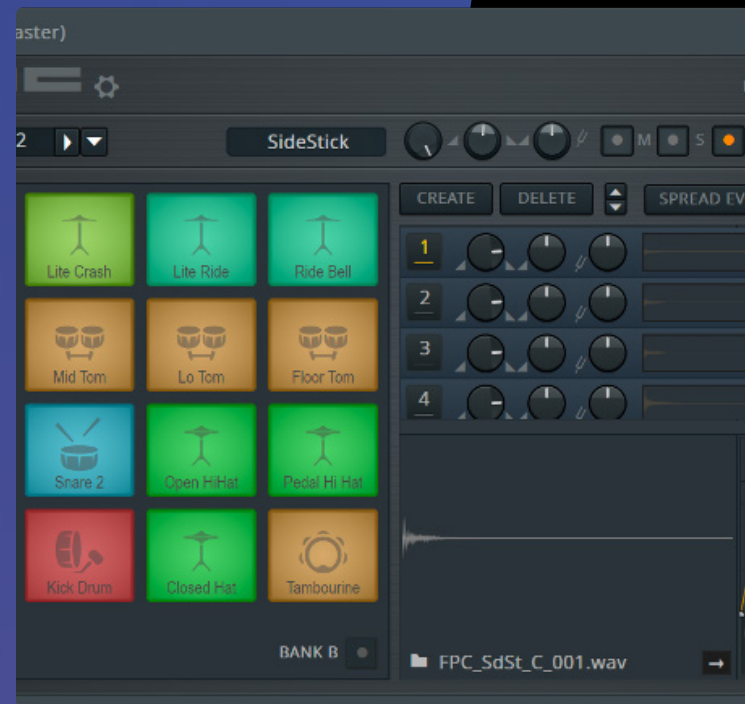

Connect with your music

FLkey is the ultimate range of MIDI keyboards for making music in FL Studio. With controls for FL Studio's Sequencer, Channel Rack and Mixer, and creative Scale and Chord modes, FLkey lets you play freely so you can make more of your music.

Stay in the groove

Sequencer Mode maps FLkey's pads to FL Studio's step sequencer for sketching beats fast. Two Pad modes give your rhythms real human feel, and get you off the grid: play straight into the Channel Rack or FPC, and trigger slices in SliceX. Need some crisp hi-hat rolls? Note Repeat makes it easy every single time.

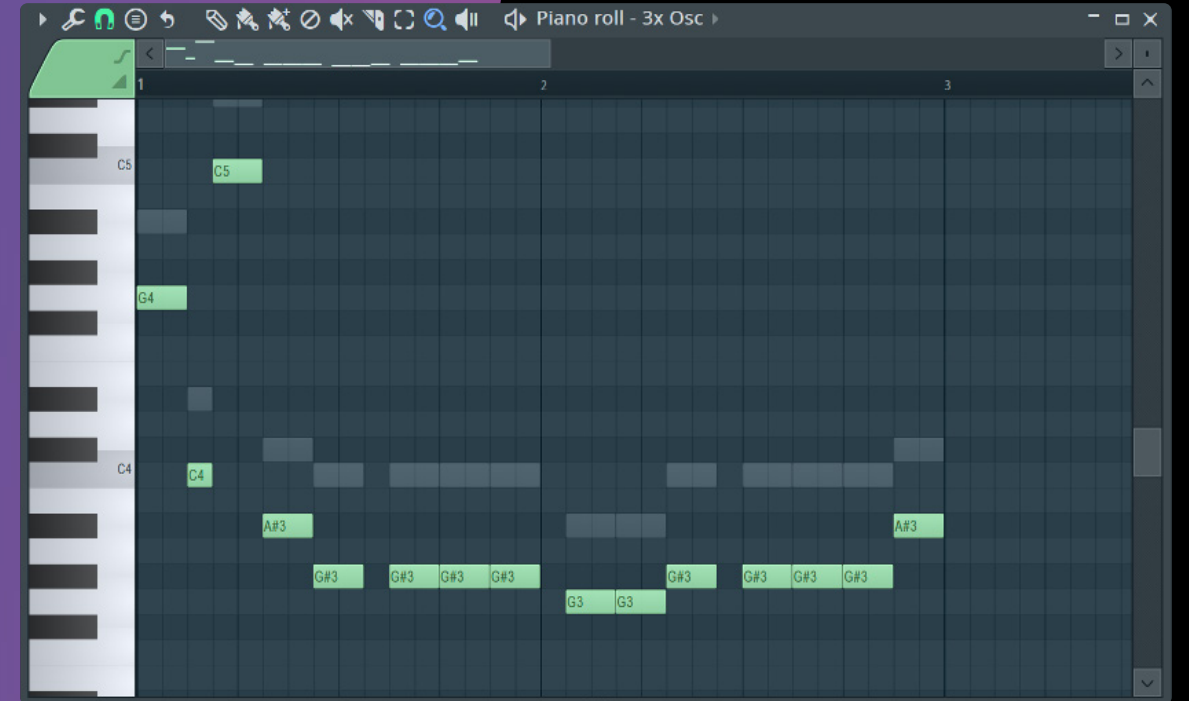

Mix, create and automate

Bring FL Studio's volume and pan controls off the screen and into your hands – use the eight knobs to tweak your mix and record automation on the fly. Essential transport buttons give you access to DAW functions in an instant. Browse presets in your Image Line plug-ins to change up instruments and sounds fast, with no mouse needed.

Connect with your music

In Scale mode you always hit the right note, keeping the music flowing. Easy-to-use Chord modes (FLkey 37 only) expand your creative potential. Combine musical tools and seamless FL Studio integration to unlock new creative boundaries and find ideas you never knew you had.

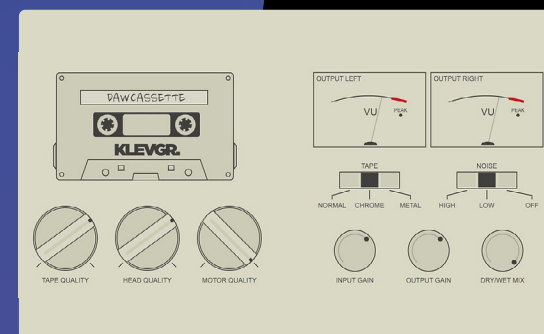

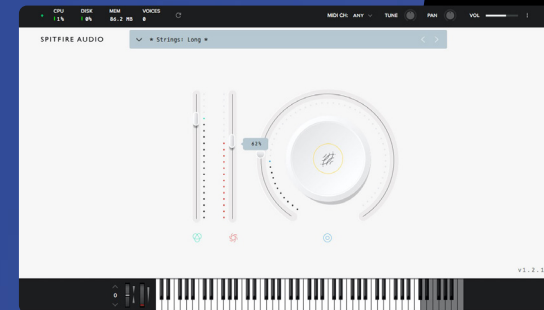

Choose your size

Whatever the size of your studio space, FLkey has you covered. FLkey Mini, with 25 mini keys, easily fits into a backpack, making it ideal for the on-the-go producer. FLkey 37, with 37 full-size keys, is the perfect balance of key range and footprint for any bedroom studio. FLkey 37 also comes with Chord Modes, additional FL Studio transport control and a screen for DAW feedback.

However you want, wherever you want

FLkey comes with everything you need to start making music: a 6-month trial of FL Studio Producer Edition and a whole suite of virtual instruments and effects from our friends at XLN Audio, Klevgrand, Applied Audio Systems and Spitfire Audio.

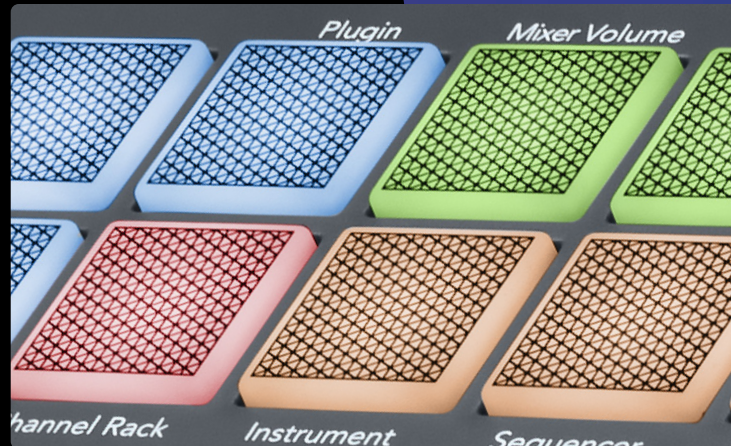

Feature Details

FL Studio Integration – Pot Modes

- Mixer Volume – Control the FL Studio Mixer volume.
- Mixer Pan - Control the FL Studio Mixer pan.
- Channel Volume (37 only) – Control the FL Studio Channel Rack volume.
- Channel Pan (37 only) – Control the FL Studio Channel Rack pan.
- Plugin – Control up to 8 carefully chosen Image Line instrument parameters.
- Custom – For customisable MIDI mapping via Novation Components.

FL Studio Integration – Pad Modes

- Channel Rack – Finger drum directly into the Channel Rack.
- Instrument – Finger drum with FPC, trigger SliceX and Fruity Slicer slices, or perform instruments on the pads.
- Sequencer – Turn the 16 pads into a Step Sequencer for the Channel Rack.
- Custom - For customisable MIDI mapping via Novation Components.

FL Studio Integration – General

- Play, Stop, Record – Control DAW transport.
- Quantise, Metronome, Undo, Redo, Score Log - Control essential DAW functionality (37 only).
- Channel Rack navigation – Navigate through the Channel Rack.
- Mixer Navigation - Navigate through the Mixer.
- Preset browsing – Browse through Image Line instrument presets.
- Tap Tempo – Set the project tempo.

Scale Mode

- Choose a scale and map it to the keys - when an out of scale note is pressed it is transposed to the selected scale.
- FLkey Mini scales
 - Minor, Major, Dorian, Phrygian.
- FLkey 37 scales
 - Major, Harmonic Minor, Natural Minor, Mixolydian, Phrygian, Major Pentatonic, Minor Pentatonic.

Chord Modes (FLkey 37)

- Fixed Chord
 - Select the notes you want in your chord.
 - Now with one key press you can play a fixed interval chord at any pitch.
- Scale Chord
 - Play a chord set directly from the pads, automatically generated based on the scale.
 - All triads, 7ths 9th and 6/9th available – 48 total chords per scale.
- User Chord
 - Assign your chosen chord to each pad, to create a bank of up to 16.
 - Trigger these chords by pressing the pads.

Note Repeat

- Made for triggering crisp hi-hat rolls when finger drumming.
- Choose a rate from 1/4, 1/8, 1/16, 1/32

Content Bundle

- FL Studio Producer Edition – 6 Month Trial
- XLN Audio Addictive Keys
- AAS Session Bundle
- Spitfire Audio LABS – Expressive Strings
- Klevgrand Røverb
- Klevgrand DAW Cassette
